

ELECTRICAL DISTRIBUTION THERMAL, MANUAL & VISUAL CHECKS

Your electrical system is a critical component of your business's success. That's why we offer comprehensive electrical services that are designed to ensure that your electrical systems are safe, efficient, and up-to-date & complies with your insurance requirements.

One of the most critical aspects of maintaining your electrical system's safety is regular checks of your distribution boards, along with RCD function tests, and thermal imaging. These checks are essential to ensuring that your electrical systems remain safe and operational, and they are mandated by the manufacturer for insurance reasons.

We specialize in providing RCD function tests and thermal imaging of distribution boards to help you identify potential problems before they turn into significant issues. Our non-invasive thermal imaging technique allows us to detect hot spots or potential defects that may lead to equipment failure or safety hazards.

We understand that your commercial property's electrical systems are crucial to your business's success. That's why we offer flexible scheduling options and personalized services to ensure that your electrical systems are always in good working order. We will work closely with you to determine your specific needs and develop a customized solution that meets your requirements and budget.

Don't wait until it's too late to take care of your electrical system.
